

- The Interactive Map will be a feature of our World Data software that will allow the user to interact with a 3D model of a globe and select a country that they wish to collect data from. After selecting a country, a menu will appear to filter several data categories to display information.

In the above sketch. The 3D Sphere will be the interactive map of the world. The drop down menu will appear after selecting a country. The graph will appear after filtering demographic information on the menu.
